ADVANTAGES

IGOL PRO 400X complies with the most stringent standards in force and is designed for use in applications such as public works, transport and agriculture.

IGOL PRO 400X is suitable for diesel engines with or without EGR, with or without particulate filter, and also for engines (anti-pollution standards: Euro VI - Tier 5 - Stage V) equipped with an exhaust gas after-treatment system with the SCR (selective catalytic reduction) process using Ad-Blue.

Its advantageous and versatile design has been developed for the latest generation of engines but is fully backwards compatible with earlier engines.

- ✓ Low Ash formulation for protection against particulate filter clogging.
- ✓ Optimizes engine cleanliness.
- ✓ Reduces deposit formation on pistons.
- ✓ Suitable for many applications due to these API and ACEA standards.
