

An anti-corrosion protection fluid.

DESCRIPTION & APPLICATIONS

SONIFAT 1080 S is a fluid which, after evaporation, leaves a dry and very fine protective film on metal surfaces.

The specific additives in **SONIFAT 1080 S** give it a high affinity for metals and water-repellent properties, thereby providing effective anti-corrosion protection in wet or saline atmospheres.

SONIFAT 1080 S is applied by:

- spreading using a brush
- immersion

SONIFAT 1080 S is tailored to protecting any mechanical parts for shipment or long-term storage.

Characteristics	Standards	Units	Values
Appearance / Colour	-	-	Red fluid
Density at 15°C	NFT 60-101	kg/m ³	788
Flash point	NFT 0-118	°C	79

The characteristics are given purely for information and are consistent with our current production standards. IGOL reserves the right to modify them, in order to pass on technical developments to its customers. Before using this product, you should consult the instructions for use and the environmental impact shown on the technical and safety data sheets. The information given above is based on the current state of our knowledge of the product in question. The product user should take all relevant precautions relating to its use. Under no circumstances may IGOL be held liable for damages resulting from misuse.
